1	What is the output of the following print() function print('%d %d %.2f' % (11, '22', 11.22))? 	2
2	What will be the output? var = 100000000000000 print(type(var))	6
3	How pack() function works on tkinter widget ?	10
4	What will be the output of the following Python code snippet? print('{:#}'.format(1112223334))	16
5	What is the output of the following? x = abcd print(list(map(list, x)))	20
6	What is the output of the following code? import turtle t=turtle.Pen() t.right(90) t.forward(100) t.heading()	23
7	Which of the following represents a template, blueprint, or contract that defines objects of the same type?	25
8	Which of the following code snippets creates and connects to a new SQLite Database?	31

9	class Count:
	
	    def __init__(self, count=0):
	
	        self.__count=count
	
	a=Count(2)
	
	b=Count(2)
	
	print(id(a)==id(b), end = '' '')
	
	c= ''hello''
	
	d= ''hello''
	
	print(id(c)==id(d))
		36

10	What happens in the below code?
	
	class A:
	
	    def __init__(self, i=100):
	
	       self.i=i
	
	class B(A):
	
	    def __init__(self,j=0):
	
	       self.j=j
	
	def main():
	
	    b= B()
	
	    print(b.i)
	
	    print(b.j)
	
	main()
